1. Introduction

Delivery Date adds a 'Choose your delivery day' picker to the Magento checkout so customers can select the day — and optionally a time slot — when they want their order delivered. The merchant controls which days are available, the bookable time intervals, and any exception or holiday days that should be blocked.

Once an order is placed, the selected delivery date and time slot are saved to the order, displayed in the admin Orders grid, and included in the order confirmation email so both staff and the customer can see the agreed delivery window.

The module is administered from the eTechFlow menu in the Magento Admin, where Time Intervals, Exception Days, and Configuration are managed.

2. Configuration & Management

Open the module's settings to configure it.

Open ETECHFLOW – Delivery Date

Click Etechflow in the left admin sidebar, then click Time Intervals.

Figure 1 — Stores menu → Configuration opens the Magento configuration area.

Open the Module's Settings

On the Configuration page, open the ETECHFLOW group in the left panel and click Delivery Date to open its settings section.

Figure 2 — Stores > Configuration > ETECHFLOW — click Delivery Date to open its settings.

All Delivery Date settings live under the eTechFlow section of the Admin left-hand menu.

2.1 The eTechFlow Menu

[Time Intervals] Opens the grid where you create and manage the bookable delivery time slots.

[Exception Days] Opens the list of blocked dates such as holidays that should be unavailable for delivery.

[Configuration] Opens the module's system configuration settings under the Settings group.

2.2 Delivery Time Intervals

Figure 3 — The Delivery Time Intervals grid, shown empty before any slots are added.

This grid lists every delivery time slot offered at checkout. Each row has an ID, a From and To time, a Position controlling display order, the Store View it applies to, a Last Updated timestamp, and an Action column for editing.

[Add New Time Interval] Creates a new delivery time slot by defining its From/To times, position, and store view.

[Filters] Narrows the grid by column values such as From, To, or Store View.

[Columns] Shows or hides columns in the grid.

[Default View] Saves or restores a named arrangement of the grid columns and filters.

[Actions] Applies a bulk action, such as delete, to the selected interval rows.

2.3 Delivery Date in the Orders Grid

Figure 4 — The Sales Orders grid showing the Delivery Date column added by the module.

The module adds a Delivery Date column to the standard Sales > Orders grid, letting staff see the requested delivery day for each order alongside purchase date, totals, and status. The column can be shown or hidden via Columns and used in filters.

3. Storefront Experience

On the storefront the picker appears during checkout, and the chosen delivery details are repeated in the order confirmation email.

3.1 Choosing a Delivery Day & Time at Checkout

The screenshot shows the Magento checkout process at the shipping step. The URL in the browser is `magento-dev.etchflow.com/checkout/#shipping`. The progress bar indicates the current step is 'Shipping' (marked with a checkmark) and the next step is 'Review & Payments'. The 'Shipping Address' section shows a selected address for 'Test User' at '123 Test Street, Suite 100, San Francisco, California 94105, United States' with phone number '555-000-1234'. An 'Order Summary' box on the right indicates '1 Item in Cart'. The 'Shipping Method' section is highlighted with an orange box and the text 'Choose your delivery day'. Below this, a calendar for June 2026 is shown, with the 3rd of June selected as the delivery day. The calendar also shows the 2nd as 'Today' and the 5th as 'Fri'.

Figure 5 — The checkout Shipping step with the 'Choose your delivery day' calendar.

Shipping Methods

The screenshot shows the 'Shipping Methods' section. The 'Choose your delivery day' calendar is visible, showing the selected date as '2026-06-18'. Below the calendar, the 'Delivery time slot' is highlighted with an orange box and the text 'Get it as soon as possible'. The delivery time slot is set to '09:00 - 12:00'. The 'Notes for the driver (optional)' field is also visible, with the example text 'e.g. Leave at side gate, ring twice'. The shipping method is set to 'Fixed' with a cost of '\$5.00'. The 'Flat Rate' option is also visible. A 'Next' button is located at the bottom right of the section.

In the Shipping step, below Shipping Methods, the 'Choose your delivery day' calendar shows the current month with selectable days. The earliest available day is highlighted, unavailable days are disabled, and the customer taps a day to book it. A 'Get it as soon as possible' option lets the customer accept the earliest delivery.

3.2 Review & Payment

Figure 6 — The Review & Payments step with payment methods and order summary.

After selecting the delivery day, the customer proceeds to Review & Payments to choose a payment method and place the order. The chosen delivery day is carried through with the order.

3.3 Delivery Details in the Order Email

The order confirmation email includes a Delivery details block listing the chosen Delivery date (for example, 2026-06-04) and Delivery slot (for example, 08:00 – 09:00). A 'Need to change your delivery day? Click here.' link lets the customer reschedule.

[Need to change your delivery day? Click here.] Opens the self-service page where the customer can pick a different delivery day for the order.

Mazhar Ali,

Thank you for your order from Main Website Store. This is an in-store collection order, so there is nothing to ship. We are preparing your items and will email you a pickup code as soon as they are ready to collect. You can check the status of your order by [logging into your account](#).

If you have questions about your order, you can email us at support@example.com.
